port 17 1 3 1 all3.gif pitti: don't be angry but the mini 10 did have dpms working on it right, ok; I just wish the standard one had I was sure the mini 9 had it but maybe I got confused by the non-working one but anyway it's running since a few days now and working pitti: don't get angry but I've no idea why gnome-session does those things and there is a bug open about it since we patch those the bug is Gnome bug 653680 in general "Does not sleep, although lid close is registered" [Normal,New] seb128: ok, are you sure? pitti: yes nice, then it's not an upstream issue pitti: no, it doesn't sleep it does it right, but "Is not sleeping" sounds ok, and of course we don't have a spec to "sleep" we could fix that with a sleep(5) pitti: "Hibernates" is better -p seb128: we have a spec for sleep? I thought it was in the "do nothing" category pitti: no, it's a new category pitti: ah, right seb128: so, I'll have a look at gnome-session tomorrow morning pitti: danke will you be at UDS? yes I will try to get online 82157476af
